

Nugget Box

These adorable little boxes with a sleeve hold three little Hershey Nugget candy bars. You can make one from just a half of sheet of cardstock. They are very easy to make, but take care to measure and score accurately.

BOX:

- Cut the long side of a full sheet of cardstock at $5 \frac{1}{4}$ ". Set one piece aside for another project.
- With the other piece, cut a rectangle $5 \frac{1}{4}$ " by $3 \frac{3}{4}$ " for the box. Cut another rectangle $5 \frac{1}{8}$ " x $3 \frac{1}{16}$ " for the sleeve.
- Measure with a ruler and mark as indicated by the thin lines on the template. SCORE along these lines.
- Using scissors, CUT along the double solid lines indicated on the template. Cut and remove the squares that are gray.
- The box has a "double walls" on each side. Fold up one long edge. Tuck the side flaps next to the "outer" wall of the long side and adhere. Then fold the "inner" wall over the side flaps, and adhere. Repeat on the other long edge. Fold in the remaining side flaps and adhere.

SLEEVE:

- Measure and mark with a ruler as indicated by the thin lines on the template. SCORE on these lines.
- Fold the sleeve around the box and check for fit before adhering the flap.

Notes: I highly recommend making one of these from scrap paper before using cardstock, just to get the hang of it. I like to cut and score the sleeve before I stamp on it, so that I can accurately place the images. You can decorate the little nuggets by stamping on address labels and wrapping the label around the candy.
