1. Fold in half.

2. Sink the corners.

3. Fold to the center.

Ignore the arrow indicating to flip over in step 4

If you find step 2 alittle difficulty, you can do it this way:

1. Pre crease in half lengthwise. Unfold. Repeat pre crease lengthwise other side. Unfold.
2. Bring up one corner to the opposite corner and pre crease. Unfold. Repeat for other corner. Unfold.
3. Then follow the above diagrams.

For the origami tree in Splitcoaststampers, use 4 different sizes of squares for the "branches" and a small rectangle for the "trunk" of the tree.
