

Genescrapp'er's Secret Slider Tutorial page 1

To make slider tracks
Cut slots across the 1 x 2 inch strips

For the 3 ½ h x 5 w inside pocket

Pierce hole 1 ¾ inches from the top and about ¼ inch in from the side edge

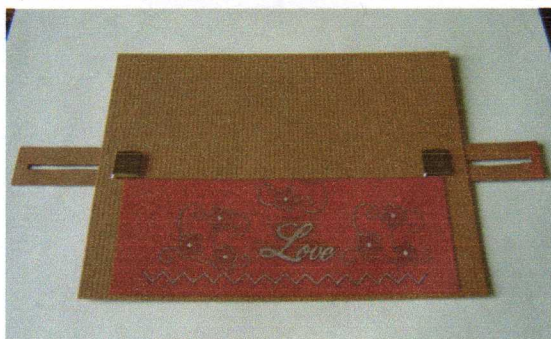

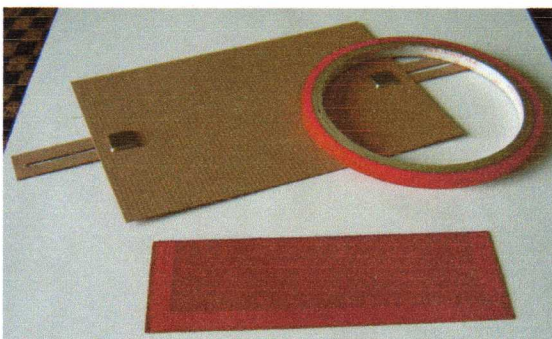

Insert brad through this piece and through the slider track - then fold ends of brad over
Repeat for opposite side

Above shows the front and back of the inside pocket piece with slider tracks attached

Stamp the 1 ½ h x 4 w strip
for the pocket front

Apply tacky tape to sides and bottom of
pocket front and attach to inside piece

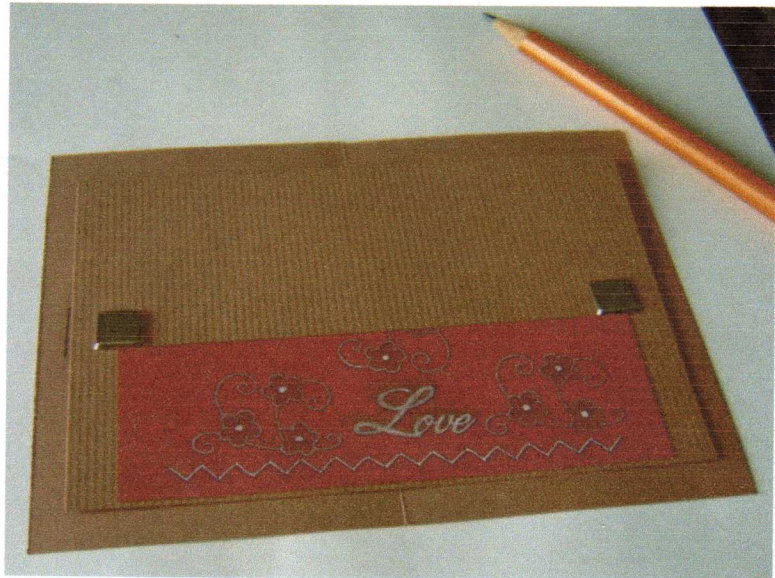

Genescraper's Secret Slider Tutorial page 2

Lay the two $4 \frac{1}{4}$ h x $2 \frac{3}{4}$ w
back pieces together

Carefully center the pocket piece
(with the slider tracks pushed in)
on top of the back pieces

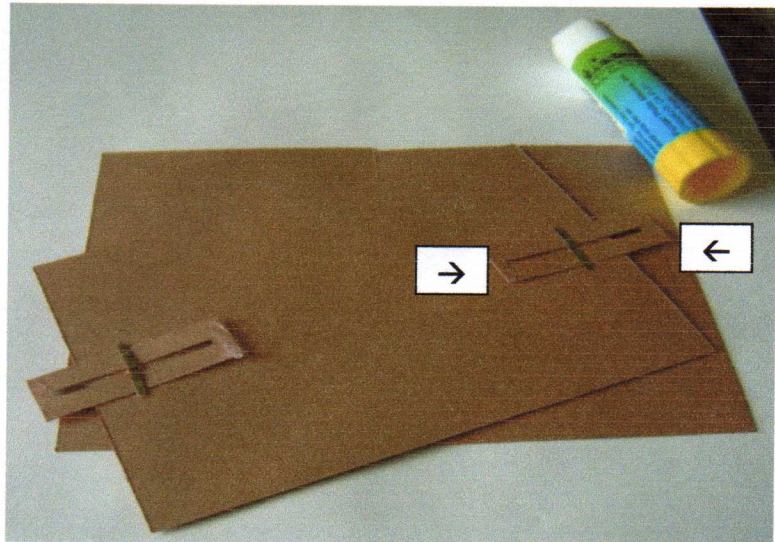

→
Use a pencil to mark the
position of the slider tracks
on side edges of the backs

Turn pocket piece over

Apply glue to the **ends only**
of the slider tracks

Being careful to keep the sliders
straight and the two back pieces
lined up - turn pocket back over

Attach pocket to the backs using
the pencil lines as your guide for
placement
