

Sidepiece should measure the length of the sides of your Purse plus $1\frac{1}{2}$ inches. It should measure the width of the side of your purse (same width you make the bottom flap) plus $\frac{1}{2}$ inch. Score $\frac{1}{4}$ inch in on each side of the sidepiece. Score $1\frac{1}{2}$ inch from the end of the sidepiece. Clip a “notch” along the $1\frac{1}{2}$ inch piece as this will be folded and attach to the bottom of the purse. (I use the Terrifically Tacky Tape (red tape) as it holds better than anything out there. I also use only SU cardstock as it is the sturdiest I’ve found.)

Place tape on the $\frac{1}{2}$ inch sides that have been scored. These will fold in and attach to both sides of your purse. I also put a piece of tape on the section that will fold into the bottom so it sticks to the actual bottom.
