Pop up card – above are templates with and without folding lines – template is 7.25 in long.

Make the folds – the square in the middle is folded into a waterbomb origami base. The top fold may vary so make it as you assemble at the end.

Pierce the two holes marked. Place a brad through the holes.

Glue the bottom triangle to one side of the centre of the card. Put glue on top triangle and fold card over to get placement correct. Attach your message/decoration to front panel.
