

Box-a-lope Directions

Directions:

Seal/tape envelope flap down. Score envelope on 3 sides. On the 4 side cut off a small amount to make the opening. Fold scored lines back and forth to soften the score. Unfold and put your hand down inside to open up the box. Bring the two bottom corner pieces out to form a triangle, tuck under using tape or glue. Using a ruler measure sides and bottom, cut cardstock to fit, line box and decorate.

Note: If you are stamping or using a wheel to decorate your box you will need to do that while the envelope can still lay flat.

Here are the score sizes I used:

SU Medium Envelope Score 1 ½"

SU Large Envelope Score 1 ½"

SU Extra Large Envelope Score 2"

Changing the size of the score or the direction of the envelope will change the size of box you get. There are no rules just wonderful projects just waiting to be made. Happy Stamping!
