Paint Can Template

1. Print two of these on 8 1/2 x 11" paper.
2. Cut on solid straight lines and also cut out circles.
3. Tape the two pieces together with no overlap, along the top edge (see illustration below).
4. This will be your template for tracing onto one long piece of paper (like wrapping paper). This piece will wrap completely around a 1 gallon paint can with a little overlap.
5. Alternatively, you could use the template centered over a piece of cardstock for partial coverage of the can.
