

# Instructions & Template for Mini Timbits Box:

1. Print this page onto cardstock (print again on scrap paper or keep this on your computer screen for reference). The margins on this page are .25" all around. Letter-sized landscape.
2. Cut out on all solid lines
3. Stamp or decorate un-printed (back) side.
4. Fold on dashed lines:  
red dashed lines = valley folds  
black dashed lines = mountain folds
5. Place adhesive in 3 areas indicated (double sticky tape works well).  
Note: for 2 flaps you must put adhesive on underside.
6. Assemble by adhering area (A) under area (B)
7. Adhere area (D) over area (C)
8. Adhere area (F) over area (E). As you press these two areas together, the curved flaps should naturally tuck into each other.
9. Squeeze handles together and tuck hooks into teardrop holes. To open, press down on handles and hooks become undone.
10. (If you need to store boxes flat, unhook handles and press the bottom inward.)
11. For larger boxes, try enlarging the template onto legal paper and trace the template onto 12"x12" cardstock.
