

Cookiestamper's One Sheet Wonder #3

I created this template in 4 1/4 x 5 1/2 inch interchangeable "blocks" so it can be easily adapted to suit your needs. You can cut it up as is, cut all 4 sections the same, or cut a mixture of the designs. And the pattern pieces were kept simple so you can embellish them as little or as much as you want. I made 7 cards with this (the last 2 with the wavy cut are the same). But you can easily get 8 cards by switching one of the blocks for the first one which only makes 1 card. The cards are photographed in order, with card #1 in the top left.

The template can be printed directly onto the back of your cardstock as a cutting guideline but **please use your trimmer to measure the cuts accurately!** The template is not exact. After printing the template onto the back of your cardstock, repeatedly stamp your images onto the front, covering the entire 8 1/2 x 11 inch sheet. It is easiest for me to start with my largest images first and finish by filling in empty spots with the smaller images. Then cut the pieces per the measurements given to make your cards. Use the photo above as a guideline for placement.
